

## DEDICATION

*Humbly, to my late parents, who loved, cared, gave everything and sacrificed for us. I also dedicate it to my brothers and sisters; and to my wife and daughter for their encouragement, endurance, and patience during many long hours of work.*

# ACKNOWLEDGEMENT

My profound appreciation and deep regards are due to my teachers, and mentors for their exemplary guidance and constant encouragement throughout my life; particularly Dr Juan Mason and Dr G Venkat-Raman, at Queen Alexandra Hospital, Portsmouth, UK.

I am extremely grateful to many colleagues for their comments on the earlier versions of the manuscript, although any errors are my own. A special gratitude is to Stephanie Wadham, Clinical Pharmacist at Yeovil District Hospital, UK.

I would also like to acknowledge the contribution of Professor Allam Ahmed, of the World Association of Sustainable Development, Dr Adil Dafa'Alla, and Mr Mouiz Ahmed in lifting the booklet to the publication platform.

# TABLE OF CONTENT

Dedication	i
Acknowledgement	ii
Table of Contents	iii
Chapter 1: Introduction	1
Chapter 2: Intravenous Fluid Therapy in Adults	3
Chapter 3: Management of Hyponatraemia	13
Chapter 4: Management of Hypernatraemia	23
Chapter 5: Management of Hypokalaemia	31
Chapter 6: Management of Hyperkalaemia	39
